Abdul Azeez Abdullah

Polymer Technologist

About Me

Engineering technology undergraduate with practical exposure in rubber and polymer processing. Focused on sustainable materials and industry innovation. Actively engaged in leadership and community work, looking for opportunities in research and development.

no.65,Panichchayadi Road,Kawathamunai, Vakaneri

Language

- English (fluent)
- Tamil (native)
- Sinhala

EDUCATION

Bachelor of Engineering Technology (Hons) – Polymer Processing
University of Sri Jayewardenepura - Sri Lanka
Study Period : 2024 - 2028

Relevant Coursework:
- Polymer Material Characterization
- Rubber Technology
- Polymer Analysis and Processing
- Elastomers and Compounding
- Materials Testing and Characterization
- Sustainable and Green Materials

Advanced Level – Technology Stream

Oddamavadi Central College 2020-2023

Result - District- 06 - 2A B

LEADERSHIP & PROFESSIONAL EXPERIENCE

Student Ambassador of NCPA *2025- Present*

National Child Production Authority of Sri Lanka

- Represent the organization in national awareness and youth empowerment initiatives.
- Promote child protection, safety, and responsible social engagement.
- Develop communication, leadership, and stakeholder collaboration skills.
- Participate in outreach programs and community development activities.

Director of Marketing *Curent Position*

Polymer Technology Society of University of Sri Jayewardenepura

Lead marketing and strategic promotion of academic and technical events.
- Manage branding, digital outreach, and student engagement initiatives.
- Coordinate industrial collaborations, workshops, and technical seminars.
- Strengthen academic–industry partnerships and professional networking.

Project Leader *2024-2025*

- Created a wearable heated clothing system with Arduino, offering real-time temperature sensing and control.
- Designed the system for low power use, user safety, and dependable performance.
- Combined electronics, smart textiles, and polymer materials to build stronger skills in advanced fzzunctional materials.

TECHNICAL SKILLS

- *Polymer Processing and Manufacturing*
- *Elastomer Testing and Quality Control*
- *Universal Testing Machine (UTM)*
- *Shore Hardness and Mechanical Testing*
- *Cure Characteristics and Rheology*
- *ASTM Testing Standards*
- *Latex and Dry Rubber Technology*
- *Process Optimization*
- *Industrial Safety and Quality Systems*

RESEARCH INTERESTS

- Sustainable Polymer Materials
- Advanced Elastomers and Rubber Technology
- Green Processing and Circular Economy
- Bio-based and Eco-friendly Materials
- Polymer Recycling and Waste Reduction
- Materials Innovation and Product Development

SOFT SKILLS

- *Research & Analysis*
- *Project Leadership*
- *Scientific Communication*
- *Creativity & Innovation*
- *Time Management*
- *Teamwork & Collaboration*
- *Marketing & Outreach*
- *Public Speaking*
